To the Recruitment team,

My name is Ruan Mackridge and I would like to join your team as a AI/ML Engineer intern.

I am a recent Computer Science Honours graduate, with a degree in Mathematical Sciences. I have also recently completed IBM's professional Data Science Certificate.

I think I would be a good addition to your team as I am an extremely curious person, who loves learning. I am always searching for new experiences and ways to grow and an internship like this seems to good of an opportunity to pass up on.

One of my strengths is my ability to work with people, I am an outgoing person and I am always looking to help the people around me.

Currently I am busy with a freelance project for Stellenbosch Football Club, where I am busy automating their Data pipeline. This involves building a pipeline that retrieves all their data from respective API's, building relevant models and integrating it with their Tableau Desktop. The challenges I have faced during this project has developed my skills in Data Science and Machine Learning, and these are skills I hope to be able to further develop in this internship.

Thank you for your time and consideration

Regards

Ruan Mackridge
